*(noun)*

**nectar**  
*(noun)*

**pollen**  
*(noun)*

**proboscis**  
*(noun)*

**royal jelly**  
*(noun)*

A sweet liquid inside flowers. Bees drink it and use it to make honey.

A piece of beeswax full of small hexagon-shaped holes. Bees make it to store honey and eggs.

A bee's long, tubular mouthpart. They use it to suck up nectar from flowers.

A mass of tiny particles on flower anthers. Bees pollinate flowers by transferring it to the stigmas of other flowers.

A light-yellow wax produced by bees to make honeycomb. People make candles from it and use it as furniture polish.

A manmade container used to keep honeybees. They are usually dome-shaped or box-shaped and made from wood.

A person who looks after honeybees so that they can harvest honey for humans to eat.

A thick, milky substance produced by worker bees to feed the queen bee larvae. It is full of vitamins for bees.
